

## KITCHEN DRAWER POT BASKET INSTALLATION INSTRUCTION

### 01 / Component Names

### 02 / Installation Precautions

Warning: To prevent accidents, installation must be performed by qualified professionals.

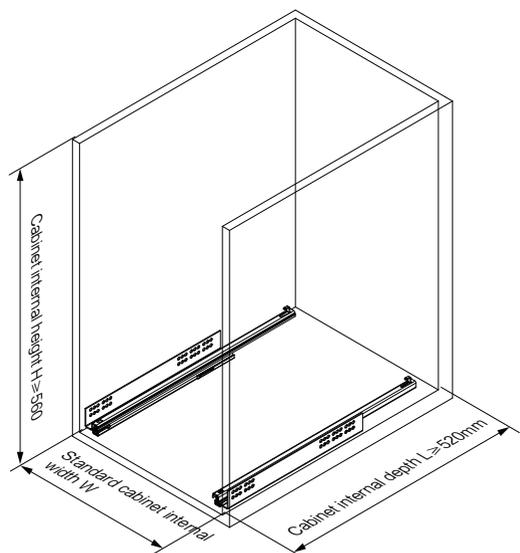

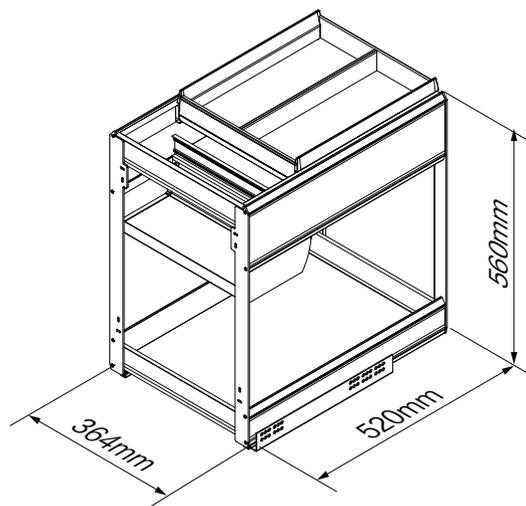

1. Please read the installation instructions carefully before installation.
2. To ensure the basket's performance, ensure the slide rails are installed according to the standard cabinet hole arrangement. Otherwise, the basket may not be able to be extended smoothly or the storage space may be inadequate.
3. Ensure the slide rail hooks are properly installed. Otherwise, the basket may become loose or make unusual noises during use.
4. To ensure a smooth installation, please use only the included accessories. Failure to do so may result in a failed installation.

## 03/Cabinet Installation Requirements

### 1. Please refer to the diagram below for cabinet installation dimensions

(the default mounting plate thickness is 18mm. For 16mm thick plates, 2mm spacers must be installed on both sides of the rails).

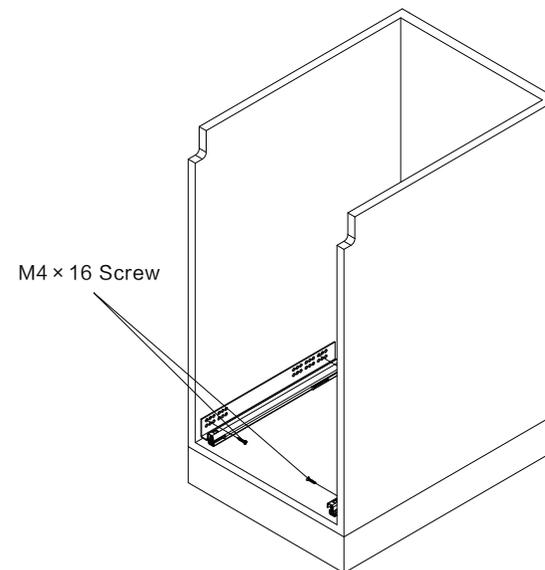

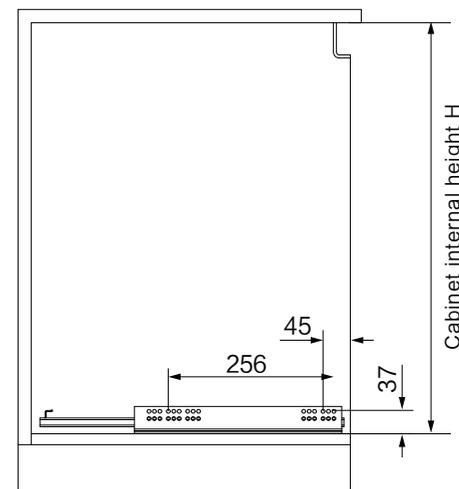

400mm Cabinet Product Dimensions:

## 04/Product Installation Instructions

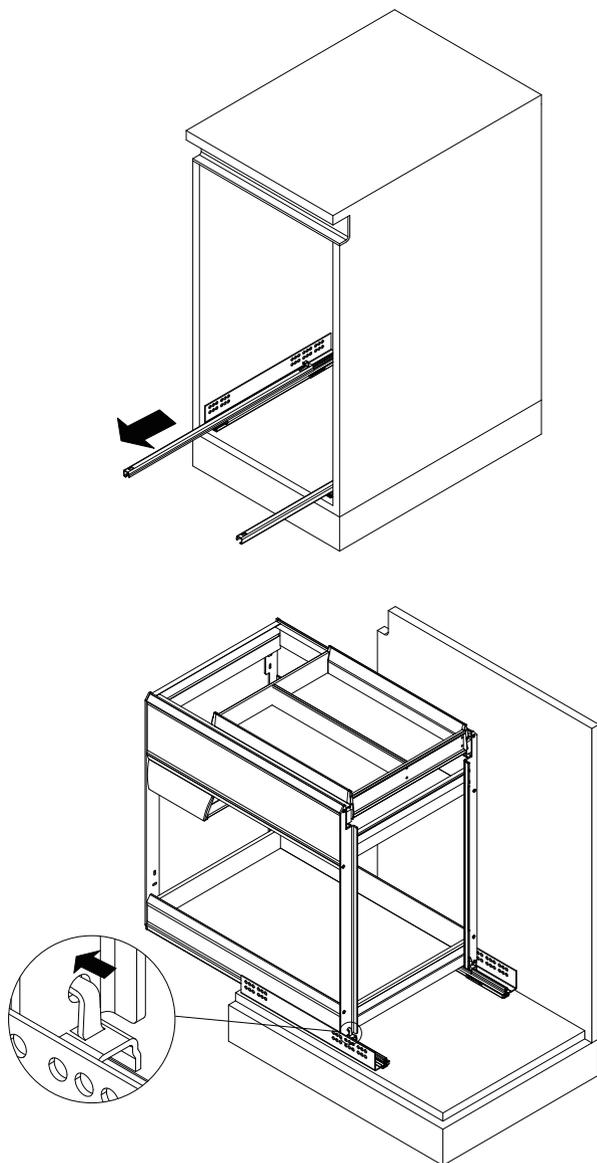

### 1. Slide Rail Installation:

- (1) Use the slide rail installation template to drill holes according to the diagram;
- (2) Install the slide rail make it fits snugly against the cabinet side panels.

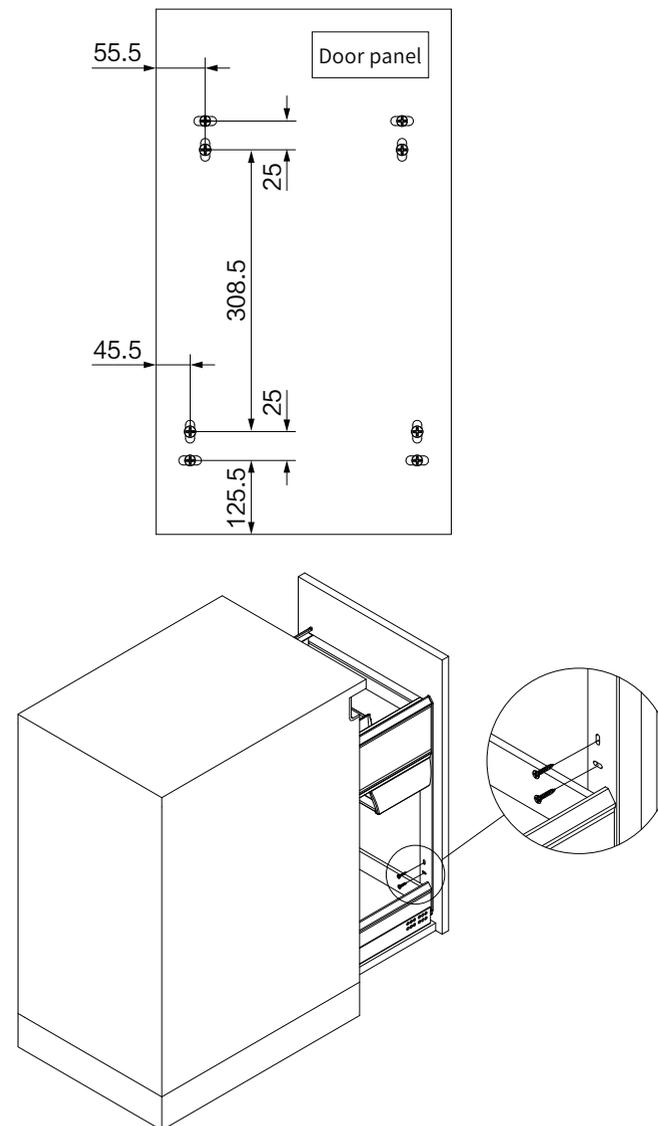

## 2. Installation of the basket:

- (1) Pull the slide rail out to the front end as shown in the diagram;
- (2) Place the drawer on top of the rail and push it to the rear end until the rail hook engages with the rear end of the basket.

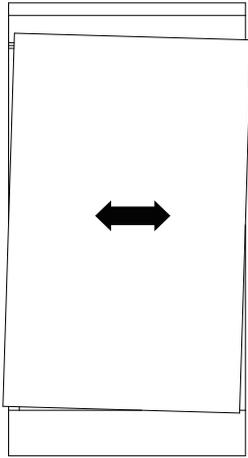

## 3. Installation of the door panel:

- (1) According to the diagram requirements, use the door panel installation template to drill holes;
- (By default, the bottom of the rail and the bottom of the door panel are aligned for installation.)
- (2) Secure the door panel with screws.

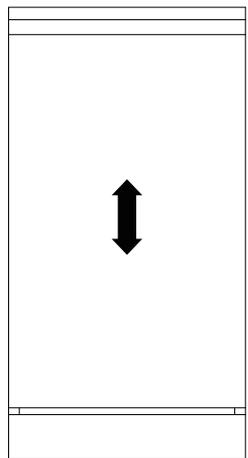

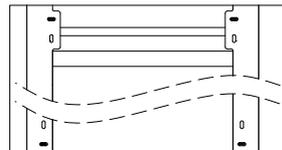

## 4. Door Panel Adjustment::

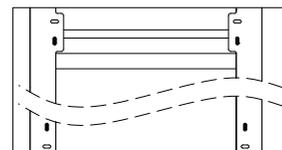

- (1) Adjust the left and right guide screws to correct horizontal misalignment of the door panel;
- (2) Adjust the upper and lower guide screws to correct vertical positioning of the door panel;
- (3) Once the door panel is properly aligned, secure it firmly with screws.

Left & Right adjustment

Up & Down adjustment

## 5. Product Testing:

- (1) Repeatedly push and pull the basket to test the smoothness of the rail movement;
- (2) If the rail extends and retracts smoothly, the installation is complete.
